

VECURONIUM BROMIDE

- Form:** 10mg vial
(Norcuron™)
- Reconstitution:** A 5ml vial of WFI is supplied. When this is added to the 10mg vial, a 2mg/ml solution results. This reconstituted solution may be diluted to a concentration of 1mg/ml using a suitable infusion fluid if required.
- Administration:** a) IV Injection
b) Continuous IV infusion
- Method:** a) A rapid IV bolus of the 1mg/ml or 2mg/ml solution may be given.
b) For IV infusion dilute the 2mg/ml solution with a suitable diluent to a maximum concentration of 4mg/100ml.
- Compatibility & Stability:** Glucose 5%
Sodium Chloride 0.9%
Manufacturer recommends use of the reconstituted solution immediately.
- Special Notes:** 1. Do not use the solution if, when reconstituted, it contains particles or is not clear.
2. Any unused solution should be discarded.
