

## **KEY RESPONSIBILITIES OF NURSE ALLOCATED AS “BUDDY” IN CLEAN ROOM OF DECONTAMINATION SUITE**

1. Primary objective is to provide support as needed to your colleagues within the decontamination unit.
2. Supervision and step by step assistance to your colleagues when “donning” or putting on your Personal Protective Equipment (PPE).
3. Supervision that the staff member or team inside the decontamination suite are always adhering to full isolation precautions (Standard/Droplet and Contact)
4. Receive registration details from the staff caring for the patient
  - The required details are listed on the Patient Registration Pro-forma that is inside in the decontamination room
  - These details then need to be communicated onwards in the ED to the appropriate personnel so that that registration process can be completed
5. Documentation of care provided to patient by the team in the decontamination room as they require it to be done.
6. Communicating to staff in the ED regarding various consumables or equipment that is required by the staff in the decontamination room
7. Supervision and step by step guidance during the “doffing” or taking off of your PPE.
