

IDUC cart

Key	Stock item	Storeroom code	Comments
-----	------------	----------------	----------

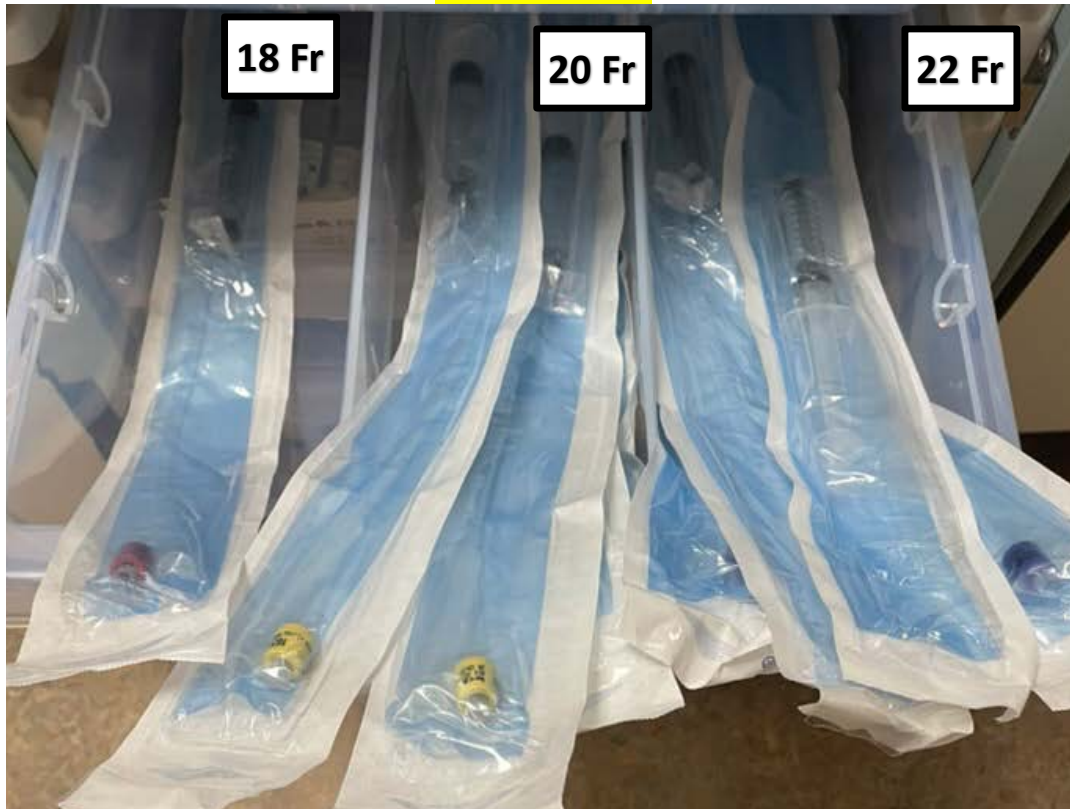

Drawer 1

	Standard urine catheters: 12, 14, 16	G 2	Slightly too long for the drawers, but work well if coloured balloon connectors are poking out slightly – this means you can pull out the right size catheter without having to open the drawer which can catch slightly due to the protruding packets.
--	--------------------------------------	------------	---

There are no special catheters stocked in the cart – these can be sourced from the storeroom if required e.g. coude tip, three-way, temperature probe etc. These standard catheters are more commonly used and they all contain the correct 10 mL water syringe.

Drawer 2

Standard urine catheters: 18,
20, 22 Fr

G 3

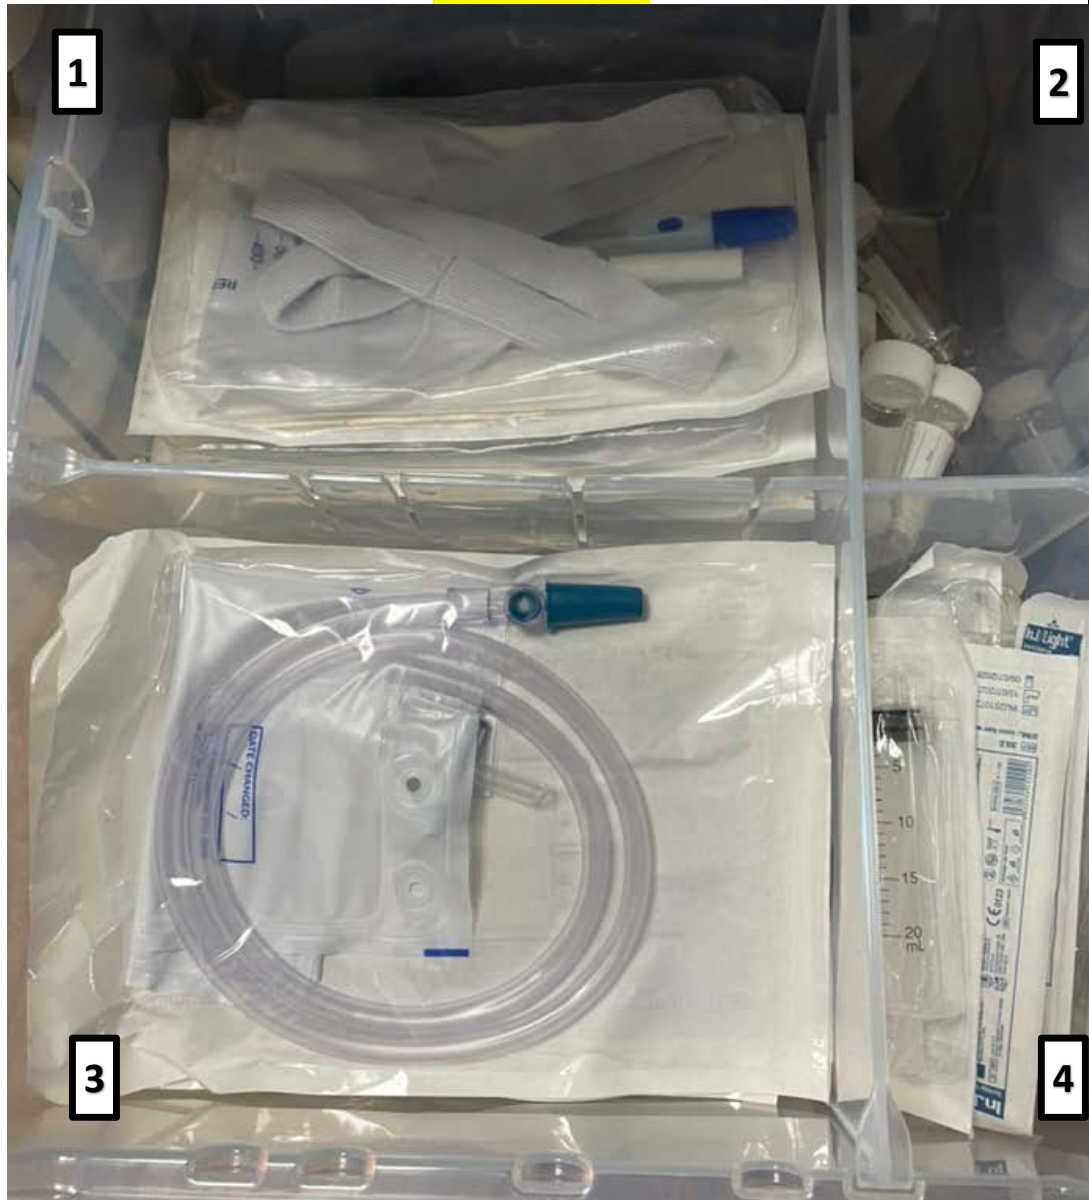

Notes as above

Drawer 3

1	Catheter tip 60 mL syringes	G 9	
2	Dressing packs	AC 1,2	<i>We have decided to stop using the urine catheter packs as they are oversized and add little beyond standard dressing pack</i>
3	10 mL water for injection vials	SF 1	<i>Do not stock saline as can damage balloon</i>
4	Optilube syringes	G 7	

Drawer 4

1	Leg bags	F 5	
2	Urine sample bottles	E 10	
3	Standard bags	F 4	
4	20 mL syringes	N 5-7	

Drawer 5

Volumetric hourly urometer
