

## ENT cart

*This cart is in development; new stock items being ordered – our aim is to reach uniformity with SIVUH ENT casualty practice. I have put the proposed list down; will create new storeroom space/ codes for these as they come in. Drawers/ stock layout to be decided.*

*This cart should be kept locked where not use – I propose the key is kept on the majors CNM keyring*

*Depending on how full the cart is with ENT stock, we can consider combining it as a cart for eyes, see details below*

Stock item	Storeroom code	Comments
<b>Drawer 1</b>		
Magnification Headlamp/ loupes		<i>This is a cheap version; I will order a better one and either chain it to the trolley or lock it in the safe with the tonometer</i>
Dressing packs	Sourced from pharmacy	<i>Once the headlamp has moved out, we can partition the top drawer for dressing packs, local anaesthetic and nozzles</i>
Local anaesthetic nozzles		
Cophenylcaine spray		
Xylocaine 10% spray		
<b>Drawers 2, 3, 4</b>		
Rapid Rhino balloons		
10mL syringes		
Merocel		
Nasopore sponges (8cm, 4cm)		<i>ENT are now using these instead of Merocel</i>
Avoca caustic applicator sticks 'Silver nitrate'		
Naseptin ointment		
Bandafix nose sling		
Micro-suction catheter		
Thudicum nasal forceps		
Alligator forceps		
Nasal trumpets, three sizes		
Jobson-Horne probe		
Katz extractor		<i>We will keep in children's ED for nasal foreign bodies</i>
<b>Drawer 5 – Possible eyes stock</b>		
Morgan lenses		
Eye patches		
Chloramphenicol ointment		
Fluorescein drops		
Tetracaine drops
