

Patient Behaviour Chart

Addressograph

Please ensure when completing the chart to add as much detail as possible:

- Activity** - What was going on in the ward at the time the patient started the behaviour
- Antecedent** - What triggered the behaviour eg. taking BP, administering the medications, turning the patient, mobilizing the patient, family leaving to go home etc
- Behaviour** - What behaviour the patient was displaying eg. Shouting at staff, holding object up to throw at staff, biting, scratching, punching, kicking, grinding teeth etc
- Consequence** - What was done to reduce the patient’s aggression or distressed behaviour eg given a cup of tea, walked up and down the ward by the staff until settled, re-orientated to the ward, administered medications as prescribed and then document if the patient settled or not.
